# Fire TAB

## INNOVATIVE AR TECHNOLOGY FOR FIRE EXTINGUISHER TRAINING

# Key Features

- **Realistic Simulation:** The app replicates real-world fire extinguisher use, allowing users to practice proper techniques in a safe and controlled environment.

- **Interactive Training Mode:** Step-by-step guidance helps users learn the correct methods for handling different types of fires.

- **Safe and Cost-Effective:** No real fire risk or additional equipment costs—train efficiently without hazards.

- **Accessible Anywhere:** With AR technology, the simulation can be conducted anytime, anywhere, using just a mobile device.

- **Performance Tracking:** Detailed performance analytics provide insights into user progress and successful application rates.

# Who Is It For?

- Companies seeking enhanced workplace safety training
- Educational institutions looking to integrate practical learning into theory-based courses
- Fire safety professionals and teams aiming to improve their skills
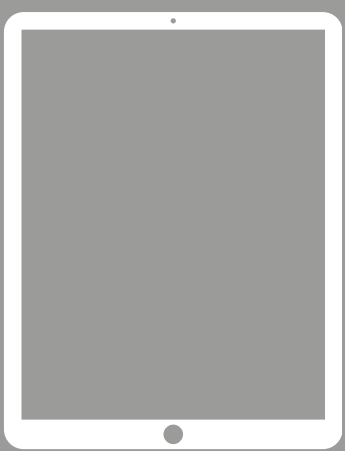

## "Re-Experince the Reality"

Fire Extinguisher AR Simulation combines modern training methods with cutting-edge technology, making fire safety education more accessible and effective than ever. Whether you're training your workforce or honing your own skills, this innovative tool is here to help.
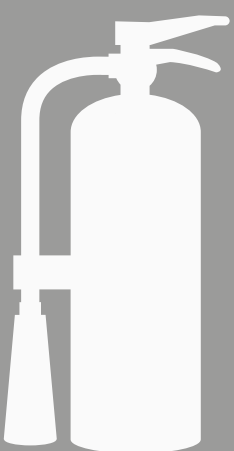

# SPECS

FireTab utilizes Bluetooth 5.0 technology to establish an extremely fast and seamless connection between the fire extinguisher and the tablet, ensuring real-time interaction by instantly detecting user movements with minimal latency.

FireTab comes with an 11-inch tablet supporting ARCore and running at least Android 13. This high-performance device ensures a seamless experience for realistic fire extinguisher simulations, providing an innovative, efficient, and secure solution for corporate training.

FireTab includes a 6 kg real fire extinguisher with a 5000 mAh battery, rechargeable via Type-C for long-lasting use. It offers a fully functional and realistic training experience.
